

Precision Injection Molds

Concept Molds
12273 North US 131
Schoolcraft, MI 49087
P: (269) 679-2100
F: (269) 679-2157

Experience. Innovation. Precision. Quality.

Full Service Mold Builder

- 3D Contour Programming
- High-Speed Machining
- Hard Milling
- CNCEDM
- Multi-Axis CNC Wire
- CNC Turning
- Complete Tool Build & Inspection to Customer Standards
- Rigorous Mold Sample Tryout

Facility & Design Capabilities

- Mold Flow Analysis
- 3D Part Design & Modeling
- Parametrically Linked 2D Part Drawing
- Comprehensive 3D Mold Design
- 3D Electrode Design
- Detailed 2D Mold Design
- Multi-Action Mold Function Animation
- Final Data & Drawing Supplied Complete

Innovative Technology at its Best

Located in Southwest Michigan, Concept Molds boasts a team of fifteen experienced tool makers and four in-house designers. Our attention to detail and commitment to service makes us leaders in tooling for the medical and automotive industries.

Concept Molds is equipped to handle your most complex tooling needs and is dedicated to providing full-service designs from your product's concept to production. We have the tools, experience, and desire to bring your products to market faster and more efficiently.
